

## Setting Up Application Environment

### IBM Cloud CLI

Date	03 November 2022
Team ID	PNT2022TMID25979
Project Name	Smart Fashion Recommender Application
Maximum Marks	2 Marks

The screenshot displays the IBM Cloud CLI documentation page in a web browser. The page title is "Getting started with the IBM Cloud CLI". It provides instructions on installing the CLI and lists various plug-ins available for installation, including Docker, Helm, Kubernetes, and IBM Cloud Functions, Object Storage, Container Registry, and Kubernetes Service. A tip suggests using IBM Cloud Shell for a cloud-based workspace. Below the documentation, a Windows PowerShell terminal window is open, showing the execution of a command to download and install the IBM Cloud CLI. The command is: `iex (New-Object Net.WebClient).DownloadString('https://clis.cloud.ibm.com/install/powershell')`. The terminal output indicates that the platform is Win64, the CLI is downloaded, and the installer is executed successfully. A final message states: "Install complete. Please restart to make the modification effective."
